The screenshot shows a web browser window with the URL `app.snowflake.com/marketplace/listing/GZTDZH40CN/neo4j-neo4j-graph-analytics`. The page displays the Snowflake Marketplace interface. On the left, a sidebar lists navigation options: 'Work with data' (Projects, Ingestion, Transformation, AI & ML, Monitoring, Apps, Marketplace), a credit balance of '\$400 credits left' with a trial end date of '28 days', and a user profile for 'Akmal Chaudhri'. The main content area features the 'Neo4j Graph Analytics' listing, which includes a search bar, a description of the product, and a 'Try Now' button highlighted with a red box and a red arrow. Below the main title, there are tabs for 'Overview', 'Business needs', 'Quick start examples', 'Trial', 'Pricing', 'Security', and 'Cost'. The 'Overview' tab is selected, showing a section titled 'SQL & AI Powered by Graph Analytics: Finds those missing answers - 30 Day Free Trial' with a detailed description of the product's capabilities. On the right side of the 'Overview' tab, there is a 'Categories' section with tags for '360-Degree Customer View', 'AI & ML', 'Audience Segmentation', and 'Cortex AI Ready'.

SQL & AI Powered by Graph Analytics: Finds those missing answers - 30 Day Free Trial

Neo4j Graph Analytics for Snowflake enables data teams to uncover complex relationships and hidden patterns directly in their Snowflake data. Users can write SQL or use the Neo4j Agent, a generative AI chatbot built with Snowflake Cortex, to ask business questions in natural language and get graph-powered answers.

The screenshot displays the Snowflake web interface. The browser's address bar shows the URL: `app.snowflake.com/hiccmnsn/lr36940/#/workspaces/ws/USER%24/PUBLIC/DEFAULT%24/practical_graph_analytics.ipynb?cell...`. The interface includes a sidebar on the left with a navigation menu and a top navigation bar with tabs for 'Workspaces' and 'Databases'. The main workspace area is titled 'My Workspace' and contains a list of files. A red box highlights the file 'practical_graph_analytics.ipynb...', and a red arrow points to it from the left. The file is a Jupyter notebook, as indicated by the '.ipynb' extension. The notebook's content is displayed in the center, featuring a title 'Integrating Snowflake and Neo4j: Practical Graph Analytics for your Data' and an 'Overview' section. The right sidebar shows a 'Table of contents' for the notebook, listing sections such as 'Integrating Snowflake...', 'Data Preparation in Sn...', 'Visualizing our Graph', and 'List Graph Algorithms'.

Integrating Snowflake and Neo4j: Practical Graph Analytics for your Data

Overview

What is Neo4j Graph Analytics for Snowflake?

Neo4j helps organizations find hidden relationships and patterns across billions of connected data points efficiently and at scale. **Neo4j Graph Analytics for Snowflake** brings the power of graphs directly to Snowflake, allowing users to run 65+ ready-to-use algorithms on their data, all without leaving Snowflake!

Why use Graph Analytics?
